Introduction of SINOTRUK:

China National Heavy Duty Truck Group Co. Ltd. (herein after to as “SINOTRUK”) has become China’s largest heavy-duty truck production base after 60 years of development, and owns the most driving modes and power coverage in heavy truck industry. SINOTRUK (Hong Kong) Limited is listed on the main board of the Hongkong Stock Exchange in 2007. It manufactured China’s first heavy duty truck in 1960, and started joint venture with Germany’s MAN in 2009. With more than 48000 employees, SINOTRUK has established an industrial structure of full-series commercial vehicles, which are dominated by heavy trucks, covering medium trucks, light trucks, buses and special purpose vehicles to its diverse customers.

Amongst its complete industrial chain plants, SINOTRUK has three truck manufacturing, six special purpose vehicle manufacturing, two engine manufacturing, two transmission manufacturing, and one axle manufacturing plant, all across China.

SINOTRUCK closely cooperates with world’s well-known truck companies: Styer, Volvo and MAN to promote various vehicles platforms with self-made engine, transmission, axle and additional products. SINOTRUK has developed prominent advantages in market network, product technology and quality and established a distinctive cultural concept with multiple manufacturing location.

In 2023, SINOTRUK achieved sales of 350,000 vehicles, among which 40,000 medium and heavy trucks were exported, Actually, SINOTRUK ranks first for 15 consecutive years in the export of heavy trucks in China. Up to now, SINOTRUK has achieved sales in more than 110 countries, established 67 overseas Representative Offices and administrative offices, and developed 125 initial distributors, 277 authorized service network and 239 part-and-accessory networks in more than 90 countries. Meanwhile, 22 overseas cooperative KD factories and 21-part warehouse in 15 countries/regions have also been established.

Introduction of Zhongtong Bus:

Zhongtong Bus Holding Co., Ltd. is one of the earliest listed bus manufacturers in China with total asset of RMB 12 billion, 592,900,000 shares. Zhongtong employ more than 4,000 staff at a site of 934,000 square meters. There are 1,500 sets of production equipments in production line that meet Netherlands BOVA technology and advanced international standard with a capacity of 30,000 new- energy and energy-saving buses. As a leading model of Chinese bus industry, Zhongtong Bus has been devoted to the manufacturing of buses for more than 40 years and has grown into an expert in bus manufacturing. By virtue of years of technology & experience accumulation, on the basis of state-certified corporate R&D center, postdoctoral workstation, and state-certified labs, and in alliance with national famous universities and institutes, Zhongtong has been dedicated to the research of safety, energy saving, and new energy technologies of buses with more than 100 patents and making of more than 30 state standards , and has obtained more than 50 domestic and international awards as well, thus powerfully pushing forward the progress of Chinese bus industry.

Zhongtong Bus is always committed to innovation and development. Early in the 21 century, Zhongtong Bus introduced advanced European bus manufacturing technology and developed a series of buses product leading the Chinese bus industry. They cover highway buses, public buses, tourist buses, school buses, RV, including 5.5m light buses to 18m luxury buses, 13 series and 260 models in total. Those products have strong market competitiveness and a good reputation in the market. They are sold well in domestic market and have been exported to more than 90 countries and regions. The sales of new-energy products top busindustry. In recent years, Zhongtong Bus has growing by more than 30% with a sustained, rapid and sound development.

Now Zhongtong Bus has developed into one of the most powerful and competitive bus enterprise and committed itself to "building a world-leading green bus industry cluster". Looking into the future, Zhongtong Bus is marching forward under the direction of "internationalization" and new energy strategy.

Introduction of ACE:

ACE: ACTION CONSTRUCTION EQUIPMENT is India's leading material handling and construction equipment manufacturing company with a majority market share in Mobile Cranes and Tower Cranes segment. In addition to Mobile Cranes, ACE also offers Mobile/Fixed Tower Cranes, Crawler Cranes, Truck Mounted Cranes, Lorry Loaders, Backhoe Loaders/Loaders, Vibratory Rollers, Forklifts, Tractors & Harvesters and other Construction Equipment. These Plants are fully equipped to produce around 12000 Construction Equipment and 9000 Tractors annually.

Products:

Backhoe Loader
Cranes
Compactors
Forklifts
Wheel Loaders
Grader

Business competitiveness

- a. Widest range of construction equipment
- b. ISO certified company (ACE)
- c. Value for money, cost effective and simple to maintain
- d. Faster cycle time, improved efficiency and productivity
- e. Good sales, service and spare parts network throughout Nepal
- f. Good service facility available from trained technician

Introduction of TECHKING TIRE :

Established in 2007, Techking Tires Limited is dedicated to mining and construction tires, focusing on specific application, integrated product R&D, quality control, and brand operation. Techking goal is to become a leading mining and construction tire brand.

Meanwhile, Techking focuses on both domestic and overseas markets throughout development. Currently, it works with mining and construction companies in more than 100 countries and supports world-renowned mining enterprises and equipment manufacturers with quality service. By now, Techking is the only Chinese tire brand to simultaneously render construction machinery tire services to China's top 3 crane manufacturers XCMG, SANY, and ZOOMLION. In the overseas markets, Techking renders services to more than 40 internationally recognized machinery manufacturers such as Liebherr, Sandvik Group, Tadano Demag, and JCB etc. It also gains the recognition of global leading mining companies including Rio Tinto, Glencore, BHP, and Vale.

As an excellent tire solution provider, Techking is gradually adopting the customer-oriented Three-lever Development Model that covers a localized marketing system, an integrated product development system, and a specialized service system. With the continuous support of technical talents and technological innovation, the company concentrates on the tires for mining and construction industries, to accommodate the application-specific products of customers, and to provide more valuable, diversified services.
